Admin Payment Method

Dss

1. Installation Guide

Step 1: Unzip the file

Step 2:
Create a new directory: app/code/Dss/AdminPaymentMethod. AdminPaymentMethod is the module's internal identifier which can be found in the "composer.json" file of the downloaded compressed file. (Please see node "psr-4").
Then put the contents of the extension ZIP file in the directory.

Step 3:
Upload the directory app/code/Dss/AdminPaymentMethod to the root directory of your Magento installation. The Magento root directory contains directories such as "app", "bin", "lib" and more. All directories should match the existing directory structure.

Step 4:
Go to Magento 2 root directory. Use command lines:
      php bin/magento setup:upgrade.
      php bin/magento setup:static-content:deploy
      php bin/magento cache:flush
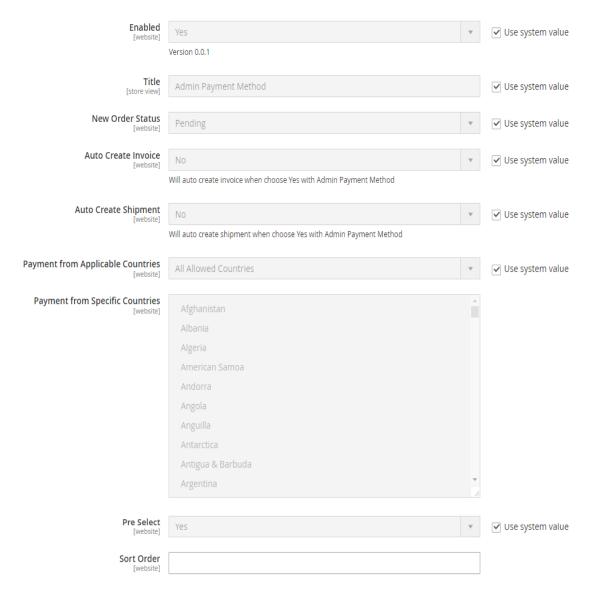

2. How Does It Work?

1.1 Module configuration:

Navigate to Stores ⇒ Configuration ⇒ Sales ⇒ Payment Methods and find the module.

1.2 General configuration:

⌄ Admin Payment Method

	Will auto create invoice when choose Yes with Admin Payment Method	
Auto Create Shipment [website]	No ▾	☑ Use system value
	Will auto create shipment when choose Yes with Admin Payment Method	
Payment from Applicable Countries [website]	All Allowed Countries ▾	☑ Use system value
Payment from Specific Countries [website]	Afghanistan Albania Algeria American Samoa Andorra Angola Anguilla Antarctica Antigua & Barbuda Argentina	
Pre Select [website]	Yes ▾	☑ Use system value
Sort Order [website]		

- **Enabled:** Choose **Yes** to enable the extension, choose to disable. The payment method does not display in frontend under any circumstances.
- **Title:** Type the name of the payment method here. This will also be displayed in the front-end Account Dashboard.
- **Auto Create Invoice:** Enable/Disable creating invoice right after the order is created.
- **Auto Create Shipment:** Enable/Disable creating shipment right after the order is created.
- **Payment from Applicable Countries:** Choose All Allowed Countries to assign this payment method to all areas or Specific Countries.
- **Payment from Specific Countries:** If you have chosen Specific Countries above, then select the countries to allow using this method.

- **Pre-select:** Choose Yes to enable preselecting the admin payment method for payment whenever you create a new order in the backend. Choose No to disable pre-selecting this method.
- **Sort Order:** Enter a number to set priority for Admin Payment Method when multiple payment methods are enabled.

Note: The module is already compatible with Hyva theme itself, so you don't have to install any extra package.
